75 mg

10) How much vitamin C does a typical kiwi have? (1 point)

150 mg

11) How does the colour of the fruit relate to the vitamin C content? (1 point)

Bright fruits have more vitamins.

Example Test for "MarkSpace" Grading Software

Name/ID: _____Dick_____   Period: ___3___

1) Describe how making a test analysis software package helps society. (1 point)

It saves teachers time which they can use in lesson prep.

2) Solve for $x = 0$ $f(x)=21x^3 - 6$ (1 point)

-6

3) Solve for $f(x) = 0$ $f(x)=(x-3)(2x+7)$ (2 points)

$3, 3\frac{1}{2}$

4) Which fictional character lives in a pineapple under the sea? (1 point)

Sponebob

5) What is the 7th Prime number? (13 points)

17

(do not try to pool me!)

6a) Which boat has right of way when two sailing boats are going to collide head on (give the simplest answer)? (2 points)

One on Starboard tack

6b) Give three cases where the simple view of the give-way boat does not hold. (3 points)

Give way boat is restricted by draft
Starboard tack boat has its engine on
Port tack boat's skipper is drunk
on rum.

7) How much does it cost for a cartel to bribe the previous Mexican president? (1 point)

100 M $

8) How do we know the answer to (7)? (3 points)

It came out in EL Chapo's
trial

9) How much vitamin C does a typical orange have? (1 point)

50mg

10) How much vitamin C does a typical kiwi have? (1 point)

150mg

11) How does the colour of the fruit relate to the vitamin C content? (1 point)

Green is better.

Example Test for "MarkSpace" Grading Software

Name/ID: _____Harry_____   Period: _____3_____

1) Describe how making a test analysis software package helps society. (1 point)

It allows students to get higher marks by paying off the software developer

2) Solve for $x = 0$ $f(x)=21x^3 - 6$ (1 point)

-6

3) Solve for $f(x) = 0$ $f(x)=(x-3)(2x+7)$ (2 points)

$3, -3\frac{1}{2}$

4) Which fictional character lives in a pineapple under the sea? (1 point)

Spongbob

5) What is the 7th Prime number? (13 points)

17

6a) Which boat has right of way when two sailing boats are going to collide head on (give the simplest answer)? (2 points)

One on starboard tack

6b) Give three cases where the simple view of the give-way boat does not hold. (3 points)

Port boat is bigger

Your boss owns the Port boat

Port boat is not under control

7) How much does it cost for a cartel to bribe the previous Mexican president? (1 point)

100 M $

8) How do we know the answer to (7)? (3 points)

I do not need to answer - see answer (1)

9) How much vitamin C does a typical orange have? (1 point)

50 g

10) How much vitamin C does a typical kiwi have? (1 point)

150 g

11) How does the colour of the fruit relate to the vitamin C content? (1 point)

Vitamin C in a white powder, and clear in solution so not related to fruit color.
